Mainly worked with **Facebook and Instagram format**. All of the further examples were made for GodeBakterier while I was interning at their company.

A lot of the **SoMe content** that's featured on GodeBakterier socials during the period of **January - February 2026** has been created by me.

Website Banners

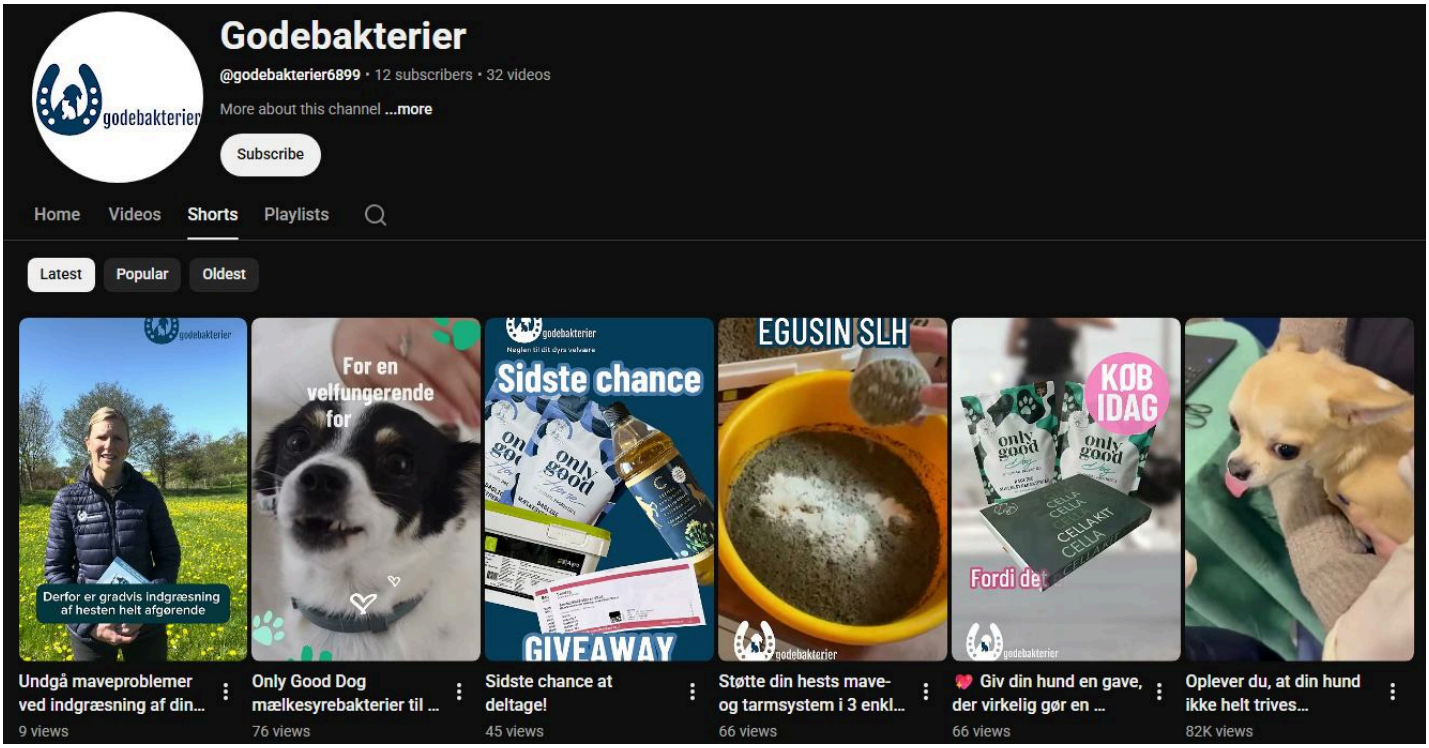

As part of the internship at GodeBakterier, I also created and designed **website banners** used for different campaigns. They came in two dimensions - **1080x1080px for mobile** and **1200x400px for desktop**.

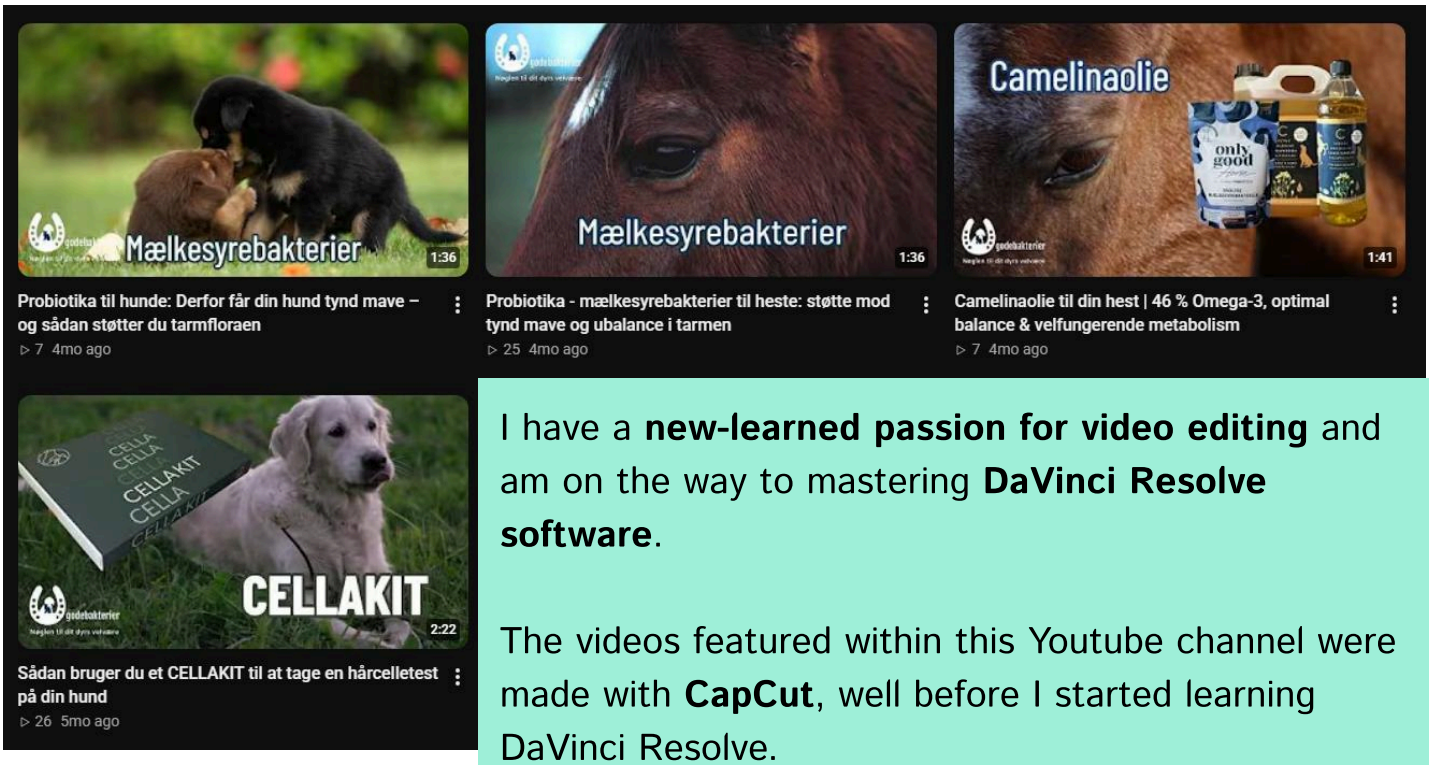

Other banner designs with different dimensions were made for affiliate websites.

Video Ads

https://www.youtube.com/@godebakterier6899

I have a **new-learned passion for video editing** and am on the way to mastering **DaVinci Resolve software**.

The videos featured within this Youtube channel were made with **CapCut**, well before I started learning DaVinci Resolve.

Video Ads

While working on my final project for my Multimedia Design degree, I decided to pick up **DaVinci Resolve** and create two unique Reels for the product launch.

One focused more on the product and providing information, while the other took on a more light-hearted tone and sought to connect with the target audience.

Link to the first, 3D design ad.

Link to the second, light-hearted ad.

Website Design

Left: Designed **webpage layout** for OnlyGoodCat page.
Bottom: Group project for **WebApp**, coded in **Visual Studio Code**, I mainly worked on integrating a **custom Chatbot daily quiz**.
